

1. Will NASA consider breaking this effort into more than one contract?

Govt. Response: No, not at this time. The purpose of this contract is to provide all inclusive mission operations support from Pre-Phase A to Phase E.

2. Will you consider a change in NAICS code?

Govt. Response: No, there is no plan to change the NAICS. The current Ground Systems and Mission Operations Contract (NNG11VM00C) and its predecessor the Mission Operations and Mission Services Contract (NNG04DA01C) utilized the 541330 code. However, contractors are welcome to suggest and substantiate different NAICS codes and benefits to the government, if any.

3. Is NASA interested in Vendors addressing ways of reducing exclusive teaming?

Govt. Response: No, not at this time. Contractors are welcome to address why this is an issue, industry concerns, and/or the benefits to the government, if any.

4. Please provide the planned missions to be supported by the Ground Systems and Mission Operations contract.

Govt. Response: The planned missions and projects include, but are not limited to: Earth Observing System (EOS), the Data and Operations System (EDOS), the Tropical Rainfall Measuring Mission (TRMM), the Polar Operational Environmental Satellite (POES), the Solar Radiation and Climate Experiment (SORCE), the Magnetospheric Multi-Scale (MMS) mission, the Global Precipitation Measurement (GPM) mission, the Mars Atmosphere and Volatile Evolution Mission (MAVEN), the Deep Space Climate Observatory (DSCOVR), the Lunar Reconnaissance Orbiter (LRO), the James Webb Space Telescope (JWST), and the Solar Dynamics Observatory (SDO).
